

H4 WORK DESK

H4 WORK DESK:

H4 is a height adjustable desk that is designed and produced by HOLMRIS B8. At first glance, it does not look like a height adjustable desk, because of its slender shape. However, HOLMRIS B8 has a lot of experts in the area that have mastered the technique of height adjustability and are able to produce desks like H4 that are so light and graceful that the electronic functions are not visible.

The desk is useful in any office space since it is very elegant and minimalistic in its design. It is available in many harmonious and contrasting colors and materials.
